

Saravanamanikandan S

Google Cloud Certified Professional Architect | Full Stack Developer | Staff Engineer

SKILLS

- *GCP/Terraform*
- *HLD/LLD*
- *Java v21/Kotlin v3*
- *Angular v16/Leaflet*
- *Python/Fast API*
- *Spring Boot v3.x*
- *JPA/Hibernate*
- *SQL/BigQuery*
- *AI/LLM/RAG/Elastic*
- *GeoSpatials/PostGIS*
- *Git Actions/Jenkins*
- *Maven/Gradle/Sonar*

CERTIFICATION

- *Google Certified Professional Cloud Architect | expiring on Apr 22, 2027.*
- Oracle *Certified* SQL & PL-SQL developer.

HIGHLIGHTS

- ***Technical lead** for 8 member's AGILE team.*
- *As a **Scrum & Kanban** trained professional, represented my portfolio during organization (Cognizant) level AGILE audit and obtained score of 3.56 out of 5.*

25 A, Gandhi nagar, Srivilliputhur, Virudhunagar, TN – 626125

PROFESSIONAL SUMMARY

Full-stack developer with **11+** years of experience in **Java** and **Angular**. Expert in architecting scalable, secure microservices on **GCP** and leading **CI/CD** automation using **GitHub Workflows** and **Jenkins**. Proven track record in designing **high- and low level systems** in **cloud** and **AI-driven** solutions across **Insurance** and **Automotive** domains, driving **AGILE**-based product solutions with a strong emphasis on platform thinking—applying **SOLID**, **DRY**, **KISS**, and **YAGNI** principles to design modular, maintainable systems.

AWARDS

- Received "**Rise and Shine**" award on APR 08, 2025 for implementing **ATLAS** project that capture, persist & transform Geo fences using **leaflet** & **hibernate spatial** in **GCP** with zero defect & within timeline & budget.
- Received "**Rise and Shine**" award on Sep 26, 2024 for implementing the first **AI search and summarisation** feature incorporating **RAG**, **Elastic search** & **LLM**.
- Received "**Customer Champion**" award on Jun 14, 2024 for the pilot project on **Geospatial data visualisation** using **GeoServer** (**WMS**) as part of **Kinetica** to **BigQuery** migration.
- Received "**Customer Champion**" award on Dec 18, 2023 for the successful launch on **Technician Speciality** feature supporting around **48 locales** in **GCP**.
- Received "**Customer Champion**" award on Jul 18, 2023 for the successful migration of 3 micro-services from **Azure-PCF** to **GCP-Cloud Run** & Migrated DB with around lacks of records from **MS SQL** to **Postgres** without any issues.
- Received "**GEM**" award on Dec 18, 2022 for the successful implementation of **Retail & Fleet service booking** in **Azure-PCF**.
- Received "**GEM**" award on Dec 18, 2021 for the successful implementation Fleet **service booking** features for US & EU market in **Azure-PCF**.
- Received "**Star of the Month**" award for the successful implementation of CICD automation for the Spring Batch and SOAP based applications with zero defects.
- Received "**Star of the Month**" award for the successful migration of monolithic **Spring MVC** to spring boot micro-services.
- Received "**ACE**" award for the successful implementation of ELK log monitoring in Spring Boot micro services.
- Received "**B'Con**" award for the successful implementation of **SOAP** based **web-services** and validator framework.

EXPERIENCE

May 2021 - Current
STAFF ENGINEER | ALTIMETRIK CORP | CHENNAI | TN.

Mar 2018 – May 2021
PRODUCT SPECIALIST TECHNICAL | COGNIZANT | CHENNAI | TN.

May 2015 – Mar 2018
APPLICATION DEVELOPMENT ANALYST | ACCENTURE | CH | TN.

Jun 2014 – May 2015
JR PROGRAMMER ANALYST | E2 INFO SYSTEMS | CHENNAI | TN.

EDUCATION

Aug 2010 – Apr 2014
BE (CSE) | DMI COLLEGE OF ENGINEERING, CHENNAI,TN.

Jun 2008 – Mar 2010
HSC | THIYAGARAJA HR SEC SCHOOL, SRIVILLIPUTHUR, TN.

Jun 2003 – Mar 2008
SSLC | THIYAGARAJA HR SEC SCHOOL, SRIVILLIPUTHUR, TN.

Jun 1998 – Mar 2003
PRIMARY | THIYAGARAJA PRIMARY SCHOOL, SRIVILLIPUTHUR, TN.

PROJECTS

1. DATA TRANSFORM & FINAL

The Data Transform and Final stages consolidate vehicle usage and fault data from Big Query, apply transformations, and feed it into quality.ai. Engineers and data scientists use AI to generate insights that help optimize vehicle features for future models.

Tech stack

JAVA 21, SPRING BOOT 3.X, PGSQL, AZURE, BIG QUERY, GIT HUB WORKFLOW, GCP, CLOUD RUN, PODMAN, DOCKER, SONAR, FOSSA, 42 CRUNCH, APIGEE, GRADLE, JIB, NEXUX, JFROG

Roles & Responsibilities

1. **GCP Cloud Architect** - Secure and manage GCP resources, ensuring scalable and compliant cloud infrastructure.
2. **API Developer** - Design, implement, scale, secure, and publish APIs using APIGEE. Implement scheduled Cloud Run Jobs.
3. **CI/CD Automation Engineer** - Automate micro services integration and deployment workflows using Git Hub Actions.
4. **Technical Lead** – Refine requirements, mentor team members, and take ownership of deliverables and budget constraints.

2. ATLAS

The ATLAS project enables Ford dealers to visually define and manage vehicle parking lots by drawing shapes—such as polygons—directly on maps. This geospatial functionality supports remote vehicle operations, like auto-starting cars when battery levels are low. This reduces annual warranty claims about $50 million.

Tech stack

JAVA 21, SPRING BOOT 3.X, ANGULAR V16, LEAFLET V1.9.4, JTS, HIBERNATE SPATIALS, PGSQL, POSTGIS, TEKTON, GCP, CLOUDRUN, PODMAN, DOCKER, SONAR, FOSSA, 42 CRUNCH, APIGEE, GRADLE, JIB, TERRAFORM

Roles & Responsibilities

1. **API Developer** - Design, implement, scale, secure, and publish APIs using APIGEE. Implement scheduled Cloud Run Jobs.
2. **Front-End Developer** – Develop Angular applications integrated with Leaflet to render and visualize geospatial data.
3. **CI/CD Automation Engineer** - Automate micro services integration and deployment workflows using Git Hub Actions.
4. **Technical Lead** – Refine requirements, mentor team members, and take ownership of deliverables and budget constraints.

3. INSIGHTS CATALOGUE

Insights Catalogue is a centralized knowledge hub that aggregates data from sources like SharePoint, Confluence, and Looker Studio. It offers controlled access to vehicle features, innovations, and trip metrics, with **AI-powered search**, summarization (**RAG**, **LLM**, **Elastic Search**), and **chat bot** interaction via **Vertex AI** for seamless document parsing.

Tech stack	JAVA 21, SPRING BOOT 3.X, ANGULAR 16, PGSQL, POSTGIS, TEKTON, GCP, CLOUDRUN, PODMAN, DOCKER, SONAR, FOSSA, 42 CRUNCH, APIGEE, GRADLE, JIB, GOOGLE ARTIFACT REGISTRY, TERRAFORM, DYNATRACE, SPLUNK
Roles & Responsibilities	1. **API Developer** - Design, implement, scale, secure, and publish APIs using **APIGEE**. Implement scheduled Cloud Run Jobs. 2. **Front-End Developer** – Develop Angular applications integrated with **Leaflet** to render and visualize **geospatial** data. 3. **AI/ML Expert** – Implemented a **RAG** based AI search & summarisation replacing traditional keyword search using **Elastic search**, **Vertex AI** in **Python** & **Fast API** framework. Implemented "**Talk to Insights**" – an AI based **chat bot**, developed using **Vertex AI document parsing**. 4. **CI/CD Automation Engineer** - Automate micro services integration and deployment workflows using **Tekton**. 5. **Technical Lead** – Refine requirements, mentor team members, and take ownership of deliverables and budget constraints.

4. MAST

The Map Analysis and System Tool (MAST) serves as a bridge between data scientists and the **Kinetica** database, enabling efficient querying and visualization of both geographic and structural data. MAST allows users to save, schedule, and execute queries directly on **Kinetica**. It supports rendering geospatial data as **WMS** map layers, seamlessly integrated with **Here**.js for interactive visualization.

Tech stack	JAVA 11, SPRING BOOT 3.X, ANGULAR 12, PGSQL, POSTGIS, TEKTON, GCP, CLOUDRUN, PODMAN, DOCKER, SONAR, FOSSA, 42 CRUNCH, APIGEE, GRADLE, JIB, GOOGLE ARTIFACT REGISTRY, TERRAFORM
Roles & Responsibilities	Led a pilot implementation to render and visualize geospatial data as WMS map layers using Geo Server, supporting the migration from Kinetica to Big Query.

5. DTS

Diagnostic Translation System is a middleware system to translate vehicle health diagnostics into end-user messages for Email & App notifications. Supported bulk Excel uploads and UI-based CRUD operations for DTCs, warnings, and notifications, with locale-specific approval workflows.

Tech stack	JAVA 11, SPRING BOOT 2.X, ANGULAR 12, PGSQL, JENKINS, GCP, CLOUDRUN, PODMAN, DOCKER, SONAR, FOSSA, 42 CRUNCH, APIGEE, GRADLE, JIB, GOOGLE ARTIFACT REGISTRY, TERRAFORM, DYNATRACE, SPLUNK
Roles & Responsibilities	1. **API Developer** - Design, implement, scale, secure, and publish APIs using APIGEE. 2. **Migration Expert** – Migrated 3 micro services in Azure-PCF to GCP-Cloud Run with zero defect. Migrated around lakhs of records with more than 30 tables from MS SQL SERVER to PG SQL without any defect. 3. **Front-End Developer** – Develop Angular applications integrated with xlsx.js parsers to parse excel to JSON. 4. **CI/CD Automation Engineer** - Automate micro services integration and deployment workflows using **Jenkins**. 5. **Technical Lead** – Refine requirements, mentor team members, and take ownership of deliverables and budget constraints.

6. OSB (RETAIL & FLEET)

Online service booking platform for vehicles, catering to both retail and fleet customers across different regions including CANADA, US, EU etc. Integrated vehicle alerts from diagnostic and prognostic data (ECU, DTCs, warning) to trigger service needs. Offered features like pickup and courtesy car offerings, discount vouchers, and streamlined warranty claims.

Tech stack	JAVA 11, SPRING BOOT 2.X, VUE JS, MS SQL, JENKINS AZURE, PCF, SONAR, FOSSA, 42 CRUNCH, GRADLE
Roles & Responsibilities	1. **API Developer** - Design, implement, scale, secure, and publish APIs using Apigee. 2. **Front-End Developer** – Develop VUE JS application. 3. **CI/CD Automation Engineer** - Automate micro services integration and deployment workflows using **Jenkins**. 4. **Technical Lead** – Refine requirements, mentor team members, and take ownership of deliverables and budget constraints.

7. ECOS

Enterprise Claim Operating System (ECOS) manages end-to-end insurance claim workflows, starting from **First Notice of Loss (FNOL)** through exposure assessment, reserve allocation, and payment processing. It incorporates fraud detection and eligibility analysis to ensure accurate claim handling. The system leverages **Guidewire** for core claims operations and integrates with supporting applications via Spring Batch and SOAP services

Tech stack	JAVA 8, SPRING BATCH 4.x, SOAP, REST, SONAR, MAVEN, GUIDEWIRE, JENKINS, JBOSS, ORACLE, SCRUM, RALLY, GIT HUB
Roles & Responsibilities	1. **API Developer** - Design, implement, scale, secure SOAP web services. 2. **Spring batch Developer** – Develop Spring Batch Job and schedule them using Spring Batch manager. Each spring batch Job can also be triggered on-demand as a SOAP WS. 3. **CI/CD Automation Engineer** - Automate web services integration and deployment workflows using **Jenkins**. 4. **Technical Lead** – Refine requirements, mentor team members, and take ownership of deliverables. 5. **SCRUM/KANBAN Trained Professional** – Represented ECOS portfolio for Cognizant level AGILE Audit and obtained score of 3.56 out of 5.

8. HAP DIGITAL

The DIGITAL team leads development and enhancement of HAP's online platforms, including quoting, Enrolment, and renewals. It integrates with third-party services using SSO and delivers solutions through agile methodologies and micro services architecture.

Tech stack	JAVA 8, JAX-WS, JAX-RS, HIBERNATE, SPRING, JERSEY, STRUTS 1.x, CSS3, JQUERY, DROOLS, JUNIT, TESTNG, SELENIUM,, ORACLE, JENKINS, JBOSS EAP 7, OPEN SHIFT, DOCKER, KANBAN
Roles & Responsibilities	1. **Backend Developer** - Design, implement, and scale, secure SPRING + JERSEY REST web services. 2. **Front-end Developer** – Design and develop UI pages with Spring MVC & STRUTS 1.x, HTML, CSS3, JQUERY 3. **CI/CD Automation Engineer** - Automate web application integration and deployment workflows using **Jenkins**.

9. HCSC-NDC

HCSC provides group life, disability, dental, and various individual solutions. The NDC team focuses on developing and enhancing online platforms for quoting, enrolment, and renewals, and exposes these applications as web services to third-party organizations per contractual agreements. workflows.

Tech stack	JAVA 6, JAX-WS, MAVEN, ANT, SELENIUM, MS SQL SERVER, SERENA DIMENSIONS, JENKINS, WEB SPHERE 7, SCRUM
Roles & Responsibilities	1. **Backend Developer** - Design, implement, and scale, secure SPRING + JERSEY REST web services. 2. **CI/CD Automation Engineer** - Automate web services integration and deployment workflows using **SERENA DIMESNSIONS.**

10. CATIE

CATIE is a web-based application designed for senior residents in U.S. community centers. Installed on dedicated devices, it provides access to weather updates, local restaurant availability, email, and SIP-based calling. Administrators can manage communications by sending event invitations, broadcast messages, and surveys to residents.

Tech stack	JAVA 6, JAX-WS, SPRING MVC, HIBERNATE, ANT, ASTERISK-SIP, MY SQL 5.x, SVN, JBOSS 6.0 AS
Roles & Responsibilities	1. **Backend Developer** - Design, implement, and scale, secure SPRING + JERSEY REST web services. 2. **Front-end Developer** – Design and develop UI pages with Spring MVC, HTML, CSS3, JS and JQUERY.
